Genuinevisegrip H1 \$45.99

7in by 1.5in bar stock 3/16in thick with 2 heavy duty S0239's in to bar. One on each side of the vise grip. Painted gold to set it apart from the crowd. Price it yourself and have someone weld it up and you will agree it is a bargain. Another great product from The Aluminum Box Company. Manufactured in house. This version is mostly used for a CB Antenna and a AM/FM antenna on the same mirror. Horizontal application

Genuinevisegrip H2 \$45.99

7in by 1.5in bar stock 3/16in thick with 1 heavy duty S0239 on one side and the other side is pre-drilled for the Pana Pacific SR-3653 & SR-3652. Hole only. Painted gold to set it apart from the crowd. Price it yourself and have someone weld it up and you will agree it is a bargain. Another great product from The Aluminum Box Company. Manufactured in house. This version is mostly used for a CB Antenna and a Pana Pacific Satellite or Wilson antenna on the same mirror. Horizontal application

Genuinevisegrip H3 \$45.99

7in by 2in bar stock 3/16in thick with 1 heavy duty S0239 in to bar. This bar is wide enough to allow you to mount your magnetic Satellite antenna opposite the CB antenna Painted gold to set it apart from the crowd. Price it yourself and have someone weld it up and you will agree it is a bargain. Another great product from The Aluminum Box Company. Manufactured in house. This version is mostly used for a CB Antenna and a Magnetic Satellite antenna on the same mirror. Horizontal application. Similar to pic except the bar is wider.

Genuinevisegrip H4 \$55.99

7in by 1.5in bar stock 3/16in thick with 2 heavy duty Firestick S0239's in to bar. One on each side of the vise grip. An extra 90 degree bar is welded to give you additional mounting area for the Satellite antenna. Like the Wilson or Pana Pacific types. Painted gold to set it apart from the crowd. Price it yourself and have someone weld it up and you will agree it is a bargain. Another great product from The Aluminum Box Company. Manufactured in house. This version is mostly used for a CB Antenna and a AM/FM antenna and Satellite Antenna on the same mirror. Horizontal application Holds 3 seperate antennas.
